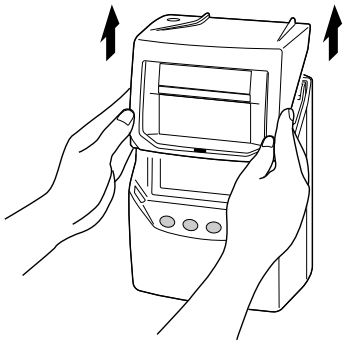
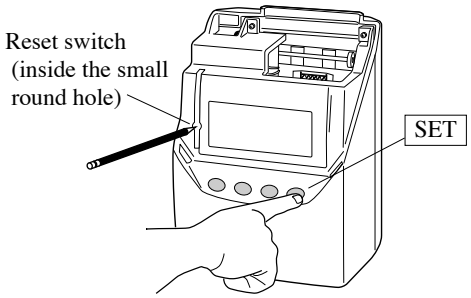
HOW TO PRINT PARAMETER SETTINGS USING A MODEL 7000E

STEP 1:
Removing Top Cover

Unlock cover. Hold the left and right sides of the cover and lift up.





Step 2 (illustration)

STEP 2:
Activating "Parameter Print" Mode

Press and hold the right control button (4th), and press reset switch simultaneously while holding down right control button. Display goes blank.

Release Reset button first then release right-side button. Display will show (1P) and (1).

STEP 3:
Print Time Card

Insert time card. The clock will print parameters on time card as shown on right..

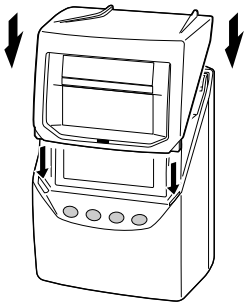
STEP 4:
Exit "Parameter Print" Mode

Press and release Reset Switch (see illustration in step 2 for location of Reset Switch). Normal operation will resume.

STEP 5:
Replacing Top Cover


Fit the plugs on both sides of cover into the holes located on the unit of the body. Then push down while pulling the cover slightly forward.
